

CUSTOMER MEMO

Dear Valued Customer,

We are writing to you to inform you of price changes effective May 1st, 2019 on our 12-16" steel rims; assembly pricing will be affected as well. A new duty is being placed on Chinese 12-16.5" steel rims in response to a petition filed by Dexstar. On April 16, 2019, the Department of Commerce announced its affirmative preliminary determination in the antidumping investigation of 12-16.5" imported steel rims from China. This tariff was announced at 44.35% and set retroactive 90 days from its official announcement. This is in addition to countervailing duty announced last month and the 10% section 301 tariff announced in September. If either the Department of Commerce or ITC issue a negative final determination, on the antidumping case, Countrywide Tire and Rubber will be issuing refunds for the differences.

Despite the current difficulties associated with importing from China, Countrywide fully intends to remain loyal to its manufacturers. We believe in our factory partners in China and in their ability to produce the absolute highest quality and most complete product lines for our customers. Our long relationships with these factories have been instrumental in allowing us to provide industry leading warranty services and in allowing us to design and produce innovative new products and product lines.

Effective May 1st, 2019 please access your updated pricing by logging in - www.countrywidetire.com.

From your dashboard, in the download section, click on the "Countrywide Click" button. It will automatically open in your default web browser and download your current price file. Thank you for your business!

Thank you!
